

Measured holding force of a single APAK 11.4 snowguard : **0.34** [kN]

D: distance between snowguards' rows on the PV array surface (= module width for landscape/horizontal configurations, or module length for portrait/vertical configurations) : **1.76** [m]

Number of APAK 11.4 snowguards per linear meter of horizontal or landscape modules

Snow height on the ground [cm]				Snow load		Roof pitch in degrees [°]

Resulting snow load on snowguards in kN, depending on snow load in kN/m² and roof pitch, according to EN 1991-1-3, cl. 6.4

Color coding - n. of APAK snowguards per linear meter in the horizontal direction:

3	4	5	6	7	NO
50.0	33.3	25.0	20.0	16.7	Snowguards not effective

Resulting distance d_x between snowguards [cm]:

A: Distance between two adjacent PV modules' edges **11.4 mm**
 INPUT: maximum distance in the horizontal plan between rows of snowguards or between the first row of hooks from top and the ridge
